

REMOTE INFORMED CONSENT & TERMS OF USE

Project Title: EduQuest

NTU-IRB ref no. IRB-2026-847

Version: 20 Jul 2026

1) Introduction

“EduQuest”, is a Learning Management System (LMS) developed with a Large Language Model (LLM) which plays a partial role as practise assistant to help students learn based on any notes provided. The system was developed for the attendance tracking and a gamified learning experience. Before you proceed and use the system, it is important for you to understand the purpose of the research study and what will be expected of you.

2) Purpose of the Research

The aim of this research study is to investigate effectiveness of using an LLM for learning and whether if providing a gamified learning experience enhances student learning experience. This study is conducted by Tang Nian Ci, a student from the School of Physics and Mathematical Sciences at Nanyang Technological University, and Ong Chin Ann, Lecturer from the College of Computing and Data Science at Nanyang Technological University.

3) Procedure, Data Collection

The system will be made available and accessible by registered users throughout the semester (except for the period during maintenance or otherwise informed by the administrator). Upon registered, your NTU email address and your name will be recorded in the database. Your interaction with the LLM, i.e. quest generation, will be recorded in the database as well. During classroom sessions, your participation through Wooclap will also be recorded and stored in the system.

4) Data Use and Confidentiality

Your identity and personal information will be kept confidential and stored securely. The quests stored in the database will be use as part of the LLM features improvement, analytics (for example, effectiveness of question), and for this research purposes only. The aggregated results and finding from the analysis may be published or presented for academic and scientific purposes only, but your personal information will never be disclosed. Possible outlets of dissemination may be within the project team members and potentially carried forward for future project as background study.

5) Benefits & Risks

Your participation in this research may benefit you personally through having a support team that developed an LLM specifically for studying. Not only that, the gamification features may increase your motivation. It will also help us understand the effectiveness of LLM in education and the benefits of providing a gamified experience for learning.

There are minimal risks associated when using the application, for example, the response provided by the LLM might be inaccurate which might cause psychological discomfort or disturbance. Your scores will also be shown on a leaderboard, however, you can change your nickname to avoid personal identification.

6) Voluntary Participation

Your participation in this study is completely voluntary, and you have the right to withdraw from the study at any time without any penalty. Your access to the quest generation will be revoked or suspended if you are found (or attempt to) abusing or tempering the quest generation which may causes harm to the LLM or other users. You may stop using the LLM if you feel uncomfortable or have loss interest interacting with the LLM.

7) Questions and Concerns

If you have questions about this project, you may contact the Principal Investigator, Mr. Ong Chin Ann via email (chinann.ong@ntu.edu.sg) or call 6790 6207. You may also contact the Student Investigator, Tang Nian Ci via email (TA0002CI@e.ntu.edu.sg) for concerns regarding data collections.

This project has been reviewed and approved by NTU-Institutional Review Board. Questions concerning your rights as a participant in this research may be directed to the NTU-IRB at IRB@ntu.edu.sg or call 6592 2495.

Acknowledgement and Consent

Please print a copy of this consent statement for your records, if you so desire.
